

Gabriel M. Allison

Software Engineer | Technical Support

GitHub: github.com/gumphso • Portfolio: gumphso.github.io • linkedin.com/in/gabrielallison

PERSONAL PROFILE

Computer Science graduate with hands-on software development experience across personal projects and freelance technical work, alongside operations and client-facing roles, and a quick learner comfortable covering a small team's full technical needs, from writing code to troubleshooting systems. Based in Leicester, UK, with full right to work, no visa sponsorship required and open to relocation.

PROJECTS

Bevy Game Project

Dec 2025 – Present

Personal / Team Project, github.com/gumphso

- Designs and implements a 2D game in a small team using continuous integration through GitHub for collaborative version control and task management.
- Builds an animation system inside an Entity Component System (ECS) architecture using Rust (a systems programming language) and the Bevy game engine, deepening hands-on experience with low-level systems programming and game architecture patterns.

Hexlock, Wheeljam 2 game jam

May 2026

Personal / Team Project, github.com/Mirth-Development/hexlock

- Designed and built a 2D game in Rust using the Bevy engine with a friend for the Wheeljam 2 game jam, building the lock-picking mechanic from scratch as no official jam template existed for Bevy.
- Collaborated under a week-long timeline to scope, implement, and ship a playable submission from concept to release, sharpening rapid-prototyping and scope-management skills under time pressure.

Payment Estimation Tracking Sheet

Mar 2026 – Present

Family Business

- Designed and built a payment estimation tracking sheet for a family-run business to calculate and quote cost estimates to clients.
- Continues to update the sheet with new features and edits as the business's requirements evolve.

SKILLS

Languages: Python, Rust, Java, C++, C#, JavaScript, HTML, CSS, SQL

Frameworks & Tools: TensorFlow, Bevy (Rust), GitHub, Linux, Bash, PowerShell, AWS EC2, Bootstrap, Node.js

Methodologies & Operations: Agile, Scrum, SDLC, ServeManager, Legal Document Management, Workflow Automation

Media Production: DaVinci Resolve, Photoshop, Gimp

EXPERIENCE

TECHNICAL EXPERIENCE

Software Development Intern

May 2021 – Sep 2021

The Flood Insurance Agency, USA (Remote)

- Built and managed a GitHub-based testing environment for version control and team collaboration.
- Developed quality control tests and authored asynchronous test cases to improve product consistency and reliability.
- Automated testing for Python web components and SQL database connectors.
- Collaborated with cross-functional teams to identify and resolve software defects.

Deep Learning Research Lead

Aug 2022 – Apr 2023

University of South Florida, Tampa, FL, USA

- Led a team building a deep learning model to simplify complex sentences into accessible language, realigning project scope and timeline after the original industry sponsor closed mid-project.
- Coordinated with a new project sponsor and a USF language specialist to keep the project on track within a compressed timeframe.
- Constructed a remote-accessible Linux training environment in Python and TensorFlow, then fine-tuned hyperparameters to optimise model performance on a custom dataset.
- Presented project findings and demonstrated the model's effectiveness at the university's senior exposition.

Freelance IT Support Technician

Mar 2026 – Aug 2026

Private Clients, Lake Wales, FL, USA

- Provided in-home and remote IT support to private clients, diagnosing and resolving hardware, software, and connectivity issues.
- Reinstalled Windows operating systems, resolved printer driver conflicts, and adjusted system and network settings to restore device functionality.
- Managed client account security, including password resets and credential recovery, and configured AI assistants and voice-activated devices.
- Delivered recurring on-site visits and phone-based troubleshooting on a regular weekly schedule.

ADDITIONAL EXPERIENCE

Maintenance Technician

Jul 2023 – Apr 2024

We Measure Up, Lake Wales, FL, USA

- Performed on-site assessments and delivered maintenance solutions across residential and commercial client sites.
- Managed scheduling across multiple job sites while maintaining clear client communication.

Process Server

May 2024 – Feb 2025

My Speedy Process, Polk County, FL, USA

- Independently managed a full caseload of legal document service, maintaining accurate records in full compliance with state statutes.
- Regularly de-escalated tense field interactions, maintaining professionalism under pressure.

Office Manager

Jun 2025 – Oct 2025

My Speedy Process, USA (Remote)

- Managed operational workflows and a distributed team of field agents, administering the ServeManager platform across the full job lifecycle.
- Coordinated with out-of-state partner agencies to maintain high-volume, compliance-driven document workflows.

Freelance Video Editor

Apr 2026 – Present

Blue Collar Endurance Training, Remote

- Edits training and promotional video content for an endurance coaching business, managing the process from raw footage to final delivery.

EDUCATION

BSc Computer Science (Minor: Software Engineering)

May 2023

Florida Polytechnic University, Lakeland, FL, USA

2:1 equivalent (cumulative GPA: 3.43/4.0)
