PERSONAL PROFILE

Computer Science graduate with broad technical experience spanning software development, operations management, and legal services. Proven ability to manage complex workflows independently, coordinate teams, and deliver reliable results in fast-paced environments.

EXPERIENCE

Software Development Intern

May 2021 – Sep 2021

The Flood Insurance Agency —USA (Remote)

- Built and managed a GitHub-based testing environment for version control and team collaboration.
- Developed quality control tests and authored asynchronous test cases to improve product consistency and reliability.
- Automated testing for Python web components and SQL database connectors.
- Conducted cross-browser and cross-platform testing to ensure seamless user experience.
- Collaborated with cross-functional teams to identify and resolve software defects.

Maintenance Technician

Jul 2023 – Apr 2024

We Measure Up — Lake Wales, FL, USA

- Performed general property maintenance and repair tasks across residential and commercial client sites.
- Conducted on-site assessments and resolved maintenance issues to client specification.
- Engaged with clients to understand their requirements and delivered appropriate solutions.
- Managed scheduling across multiple job sites and maintained clear communication with clients.

Process Server

May 2024 – Feb 2025

My Speedy Process — Polk County, FL, USA

- Personally served legal documents including subpoenas, summonses, and complaints in compliance with state statutes.
- Logged all service attempts accurately with dates, times, and outcomes in ServeManager.
- Confirmed subject addresses through public records research and database lookups.
- Regularly de-escalated tense interactions in the field, maintaining professionalism and composure when subjects were uncooperative or confrontational.

Office Manager

Jun 2025 – Oct 2025

My Speedy Process — USA (Remote)

- Managed operational workflows for a distributed process serving company, coordinating a team of field agents by phone to ensure correct document routing and timely delivery.
 - Administered ServeManager platform across the full job lifecycle: creation, assignment, tracking, and invoicing.
 - Coordinated with out-of-state NAPPS member agencies to arrange service and retrieve signed and notarized Returns of Service.
 - Develops and maintains document combining workflows to handle high-volume batch processing with strict naming conventions and legal compliance.
-

SKILLS

Languages: Python, Java, C++, C#, JavaScript, HTML, CSS, SQL, Rust

Frameworks & Tools: TensorFlow, Bootstrap, Node.js, Bevy (Rust), GitHub, Linux, Bash, PowerShell, AWS EC2

Methodologies: Agile, Scrum, SDLC

Operations: ServeManager, Legal Document Management, Workflow Automation

EDUCATION

BSc Computer Science

May 2023

Florida Polytechnic University, Lakeland, FL, USA — Minor: Software Engineering

PROJECTS

Bevy Game Project

Dec 2025 – Present

Personal / Team Project — github.com/gumphso

- Designs and implements a 2D game in a small team using GitHub's Organisation and Project features for collaborative version control and task management.
- Building an animation system inside an Entity Component System (ECS) architecture using Rust and the Bevy framework.

Deep Learning Lexical Simplifier

Aug 2022 – Apr 2023

University of South Florida, Tampa, FL, USA

- Led a team building a deep learning model to simplify complex sentences into accessible language.
- Constructed a remote-accessible Linux environment for model training using Python and TensorFlow.
- Fine-tuned hyperparameters and optimized model performance on a custom prepared dataset.
- Presented project findings and demonstrated the model's effectiveness at the university's senior exposition.

AWS Web Server

Aug 2022 – Dec 2022

Florida Polytechnic University, Lakeland, FL, USA

- Deployed and hosted a dynamic website on AWS EC2, configuring the server for high availability and scalability.
- Built a responsive front end using Bootstrap and implemented a JavaScript backend.

Image Segmentor

Jan 2022 – Apr 2022

Florida Polytechnic University, Lakeland, FL, USA

- Developed a deep learning image segmentation model using autoencoders to classify objects by shape and colour.
- Wrote a preprocessing script to isolate objects based on colour data and edge detection, preparing visual data for model input.
